

Battic Door

STAIR COVER INSTALLATION INSTRUCTIONS

1. Lay Battic Door Flat - printed side down.

2. Fold one side up and turn end flaps in.

3. Repeat other side.

6. Install gasket onto stair frame.

4. Fold one end up and over. Tuck tabs into slots. 5. Repeat other side.

Hint - push down to create sharp corners.

Quick and Easy Installation Instructions

Step 1: Fold the stair cover into shape. Self-locking tabs securely lock the ends of the cover into place.

Step 2: Clean the top of the folding attic stair frame and install the foam weatherstrip.

To close: Simply lower the stair cover onto the gasket as you leave the attic. The stair cover embeds itself into the gasket creating a tight seal stopping air leaks.

To open: Simply lift cover up and move out of the way.

Tip: Add insulation to maximize the benefits of your stair cover.
